1) PV-WAVE 9.0 and JWAVE 3.51 are built and tested on Red Hat Enterprise Linux 4.0, which is based on the Linux 2.6 kernel. It has been our experience that PV-WAVE 8.5 and JWAVE 3.5 run correctly on other Linux distributions based on the 2.6 kernel.  
 2) The platforms are frozen at PV-WAVE 9.0 and will not be updated for future releases.
